

Internship at TOPbv – the food innovators (Wageningen)

Internship 32-40 hours per week (minimum 3 months). Start after August 1, 2018.

You want to do an internship at an innovative SME company that works on the development of the latest food concepts, process technologies and machines.

You are enthusiastic and have a passion for food and food production. You are a go-getter and are capable of working independently in a small team.

What are you going to do?

As a trainee you mainly work on your own research assignment. In addition, you are expected to participate and think about other projects.

For next fall we are looking for interns (BSc, MSc) on the following topics:

- Proteins (separation, structuring, NPD)
 - Profile: (food) process engineering, biotechnology, chemistry, ingredient functionality
- Natural conservation strategies
 - Profile: product development, chemistry (emulsions), microbiology
- Innovative food concepts
 - Profile: food design / marketing, product development, culinary
- Radio Frequent (RF) Sterilization
 - Profile: product development, development of analysis methods, mathematics/modelling

Interns give their internship at TOP an average of 9. They are particularly enthusiastic about the atmosphere within the team and the freedom to design and execute their own assignment. A number of trainees liked TOP so much that they never left

Job requirements

- We are looking for people who are full of drive and capable of working independently. You are able to independently design and manage a research project, but you also know when to ask for help. You are passionate and eager to learn, are open to new knowledge and experiences and are always eager to discover new possibilities and solutions.
- Of course you have a passion for **innovation, food and technology!**

Who are we?

TOP bv is an innovation company in the Food Valley region (Wageningen) that is strong in the field of development and realization of novel foods and process technologies for mainly the food industry. Our goal is to increase the profitability of the food industry by making state-of-the-art knowledge available for, and applicable to, this industry.

TOP BV works worldwide as a development partner for the food industry and its suppliers such as machine builders on projects concerning the development of new products, technological processes and machines.

In addition to consultancy TOP invests in development of technologies and associated business cases that shape the future and can be valued in different ways at a later stage. This makes TOP a unique cross between a research institute, engineering firm and incubator.

Yes, this is something for me!

Send an e-mail to vacatures@top-bv.nl in which you introduce yourself and indicate why you are the right person for this internship at TOP. Or send a letter to TOP bv - Human Resources, to Gretha Volders, Agro Business Park 10, 6708 PW Wageningen.
