

Internship 2019

Food technology / process development - BSc / MSc

Do you want to do an internship at an innovative SME company that works on the development of the latest food concepts, process technologies and machines? Are you enthusiastic and do you have a passion for food and food production? Are you a go-getter and capable of working independently in a small team of professionals? Then we are looking for you!

What are you going to do?

As a trainee you mainly work on your own research assignment. In addition, you are expected to participate and think about other projects. We are currently looking for interns (BSc, MSc) on the following topics:

- Proteins (separation, structuring, NPD)
Profile: (food) process engineering, biotechnology, chemistry, ingredient functionality.
- Natural conservation strategies
Profile: product development, chemistry (emulsions), microbiology.
- Innovative food concepts:
Profile: food design, food marketing, product development, culinary design.
- Radio Frequent (RF) sterilization:
Profile: product development, development of analysis methods, mathematics/modelling.

What do we expect from you?

- You are enthusiastic and eager to learn;
- You are able to work independently under the supervision of one of our experienced professionals;
- Your internship takes at least 3 months with a work week of 32 to 40 hours;
- You are fluent in English and/or Dutch in both speaking and writing.

Who are we?

TOP bv is an innovation company in the Food Valley region (Wageningen) that is strong in the field of development and realization of novel foods and process technologies for mainly the food industry. Our goal is to increase the profitability of the food industry by making state-of-the-art knowledge available for, and applicable to, this industry. TOP BV works worldwide as a development partner for the food industry and its suppliers such as machine builders on projects concerning the development of new products, technological processes and machines. In addition to consultancy TOP invests in development of technologies and associated business cases that shape the future and can be valued in different ways at a later stage. This makes TOP a unique cross between a research institute, engineering firm and incubator.

What do we offer?

- A fun and exciting internship in an innovative company (interns give their internship at TOP an average of 9!);
- The possibility to work on the innovations which will determine the future in food;
- An internship in which you are part of a TOP team!

Yes, this is something for me!

Send an e-mail to vacatures@top-bv.nl in which you introduce yourself and indicate why you are the right person for an internship at TOP. Please also indicate which topic has your specific interest. Or send a letter to TOP bv – Human Resources, attn. Gretha Volders, Agro Business Park 10, 6708 PW Wageningen.
